

Premium Comfort

Application

This modern asymmetrical tyre offers exceptional performance under the most demanding driving conditions.

Stiffer blocks in the outer shoulder provide precise steering response and cornering stability while the more flexible inner shoulders feature increased grooving, which provides more grip and ensures optimum road contact.

The increased groove density and distribution provides for very low noise generation and comfort.

The Premium Comfort, capable of speeds up to 270km/h, features the latest silica compound technology. This tyre provides the sophisticated and discerning driver with reduced fuel consumption and enhanced overall vehicle performance.
